Expeditious Software

Release automation for engineering teams.

We turn manual, fragile releases into self-service pipelines your teams run themselves, in your own tools and accounts. Fixed prices, and half of every project fee is due only when the result passes its acceptance criteria.

OFFERS Prices excl. VAT

Software Release Check

Free

Five minutes online.

Release Bottleneck Review

From EUR 3,500

Two weeks to a measured decision, half the fee on acceptance.

Self-Service Release Build

From EUR 14,500

Paid on green.

Release Care

From EUR 2,500 a month

RESULTS

Nike

600+ engineering hours a year saved

Store-server upgrades from 6-8 hours to about 3 per server, 8 in parallel instead of 2, across 900+ stores. Staging deploys from 10-15 minutes to about 3.

ASML

300+ engineering hours a year saved

Self-service CI in Stage Position Measurement, one view of release readiness from machine test results.

> “It was a pleasure for the team and me to work with Mateusz and I wouldn’t hesitate to hire him again.”
>
> **Maikel Jansen**
> Group leader SW Stage Position and Measurement, ASML

HOW WE WORK

- One Statement of Work per engagement
- Remote delivery, with the kickoff on site in Benelux
- A weekly delivery update
- Acceptance against the criteria in the SOW
- Everything built in your repositories and accounts, no licences

STACK IN PAST BUILDS

Jenkins, AWS, Azure; Python, Groovy, Ansible, Bash, PowerShell.
